ZOMLION CRAWLER CRANE

WIND POWER LIFTING EXPERT-ZCC9800W

EXCELLENT LIFTING PERFORMANCE

- Pioneered with super-long, multi various widths boom combinations
- Power boom booster working mode reaches **171M+7M**
- Normal boom working mode reaches **159M+7M**
- Max. lifting height reaches **180M**

FAST, EASY ASSEMBLY & DISASSEMBLY, TRANSPORT

- Max. weight of a single part is within **44T**, conform to transport regulation globally.
- Unique design wind jib, modular & light weight design, 171M+7M combination can be assembled within **24 hours**

INTELLIGENT FUNCTION & SERVICE

- Intelligent management system can remote monitor the crane status, malfunction self-diagnosis, abnormal condition warning, maintenance and so on. (optional for oversea market)

SUPERIOR OPERATING PERFORMANCE

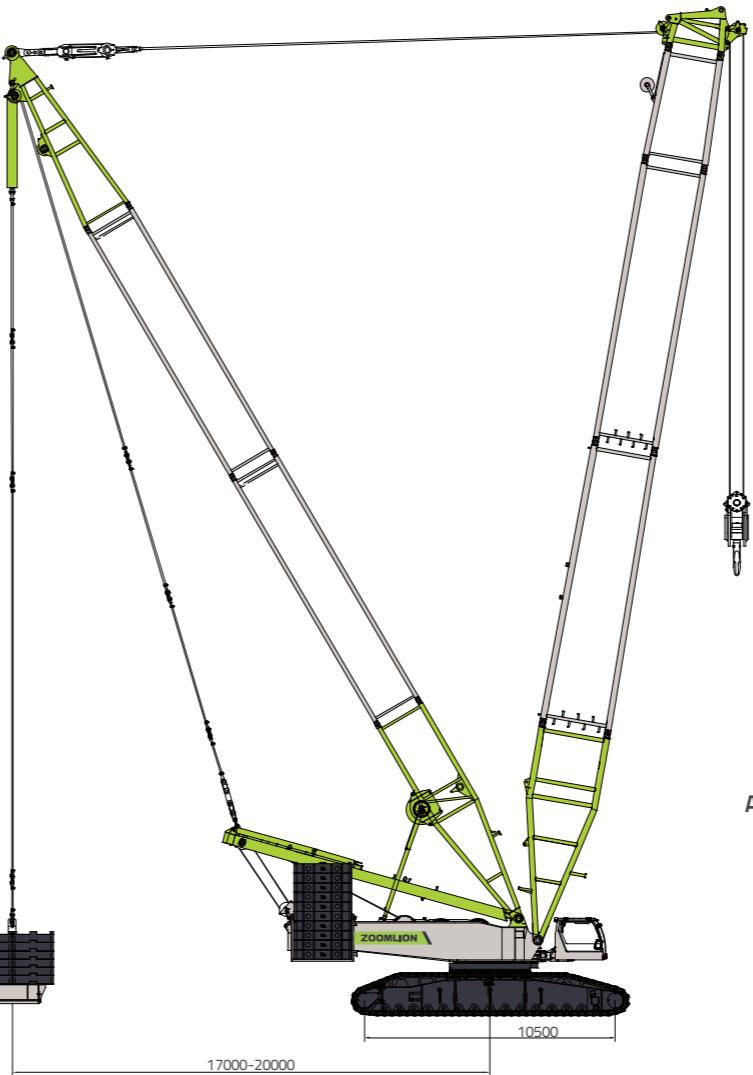

- Excellent **micro - positioning** enables wind turbine installation with high accuracy.
- High efficiency, compound operations for multi-mechanisms.

1.1 MAIN TECHNICAL PARAMETERS

	Item	Parameter
Max. lifting moment	txm	11000
Basic S boom	Max. lifting capacity × radius txm	600×7
	Length of heavy boom m	39~93
	Length of light boom m	72~114
Superlift S boom	Max. lifting capacity × radius txm	650×14(Suspended ballast of 300t) 800×9(Suspended ballast of 400t)
	Length of heavy boom m	39~141
	Length of light boom m	90~150
Derrick boom	Length of derrick boom m	42
SLHS	Max. lifting capacity × radius txm	180×16
	Length of SLHS boom head m	7
	Main boom length m	90~114
SLHSDB-1	Max. lifting capacity × radius txm	180×28
	Length of SLHSDB-1 boom head m	7
	Main boom length m	108~159
SLHSDB-2	Max. lifting capacity × radius txm	180×26
	Length of SLHSDB-2 boom head m	7
	Main boom length m	147~171

1.2 OVERALL DIMENSIONS OF SUPERLIFT S BOOM

Basic machine with undercarriage

A view (crane with boom removed)

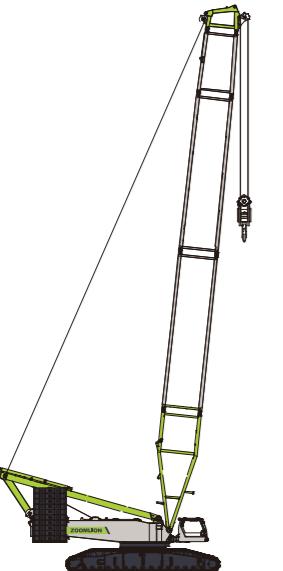

Overall Dimensions of Superlift S Boom

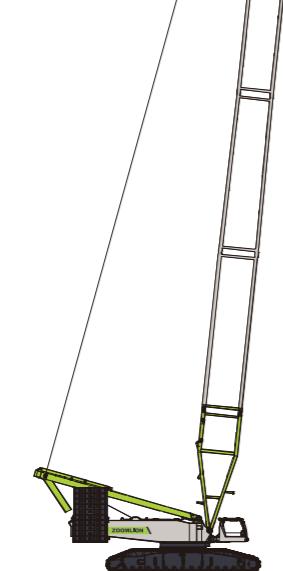

1.3 BOOM / JIB COMBINATIONS

WORKING MODE

Code of working mode	Mode	Working parameter
S	Standard main boom	S=39~93m
SL	Standard light boom	S=72~114m

Working Mode S,
Standard main boom

Working Mode SL,
Standard light boom

Code of working mode	Mode	Working parameter
SLHS	Standard light boom + wind power jib	S=90~114m HS=7m

SLHS

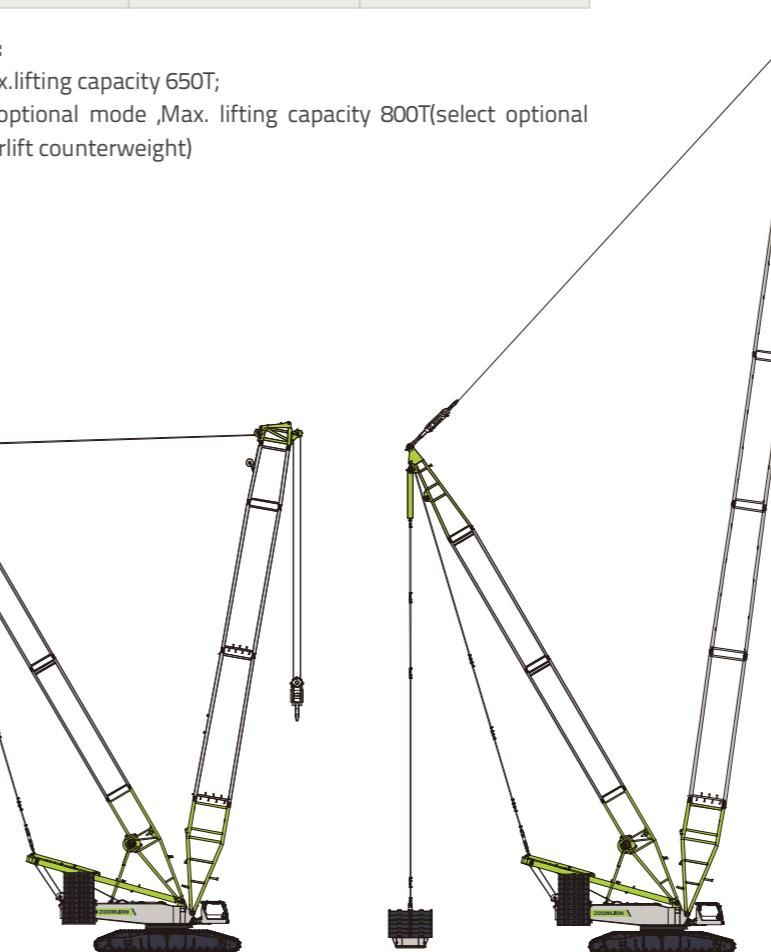

Working Mode SLHS,
Standard light boom + wind power jib

Code of working mode	Mode	Working parameter
SDB-1/2	Superlift main boom	S=39~141m
SLDB	Superlift light boom	S=90~150m

REMARKS:

SDB-1 Max.lifting capacity 650T;
SDB-2 is optional mode ,Max. lifting capacity 800T(select optional 400T superlift counterweight)

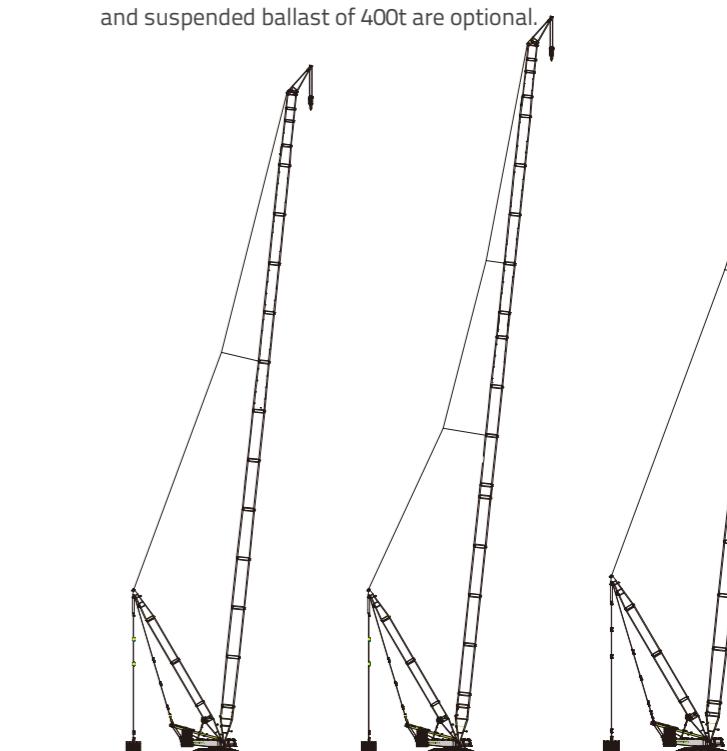

Working Mode SDB-1/SDB-2,
Superlift main boom

Working Mode SLDB,
Superlift light boom

Code of working mode	Mode	Working parameter
SLHSDB-1	Jib on superlift main boom for wind plant (power boom)	S=108~159m HS=7m
SLHSDB-2	Jib on superlift main boom for wind plant (power boom, with an ultra-wide boom)	S=147~171m HS=7m
SLHSDB-3	Jib on superlift main boom for wind plant (power boom, 270t)	S=108~138m HS=5.5m

Note:

SLHSDB-2 is an optional operating mode. An ultra-wide boom of 54m and suspended ballast of 400t are optional.

Working Mode SLHSDB-1

Working Mode SLHSDB-2

Working Mode SLHSDB-3

1.3 TECHNICAL DESCRIPTION

Hydraulic system

The hydraulic system is composed of main pump, control valve, hydraulic motor, hydraulic oil tank, oil cooler and so on. International advanced pump-control technology is applied in the hydraulic system. Main hydraulic elements such as pump, motor and main control valve, imported from Germany, are energy-saving, reliable and long in service life. Main hydraulic pump: variable displacement piston pump, driven by engine. The oil source of auxiliary mechanism is supplied by constant pressure pump and tandem gear pump. Main control valve: pilot electro-hydraulic control valve. Main circuit is controlled by pump-control system and control levers. Auxiliary mechanism is controlled by solenoid directional control valve block, which is fitted with an overflow valve. The support cylinder is wireless remotely controlled. Hydraulic oil tank — 940 L. Oil filter in hydraulic system: oil return line filter and fine filter for control oil line. Oil cooler for hydraulic system: an aluminium cooler and cooling fan driven by hydraulic motor.

Operating weight

The operating weight includes the basic machine with crawlers, 2 main winches including wire ropes(1100m and 1100m) and 39m main boom, consisting of A-frame, 210t rear counterweight, 60t carbody counterweight, and 650t hook block. Total weight-----approx.520t

Hoisting winches 1 and 2

The hoisting winches 1 and 2 are composed of imported axial piston variable displacement motor, balance valve, reducer, normally closed brake as well as wire rope. And they are controllable independently. If two hoisting ropes are reeved on one load hook, winch synchronization is used to synchronize the hoisting winch 1 and hoisting winch 2, thus keeping the load hook in horizontal position all the time. The hoisting rope is a kind of rotation resistant wire rope imported from Germany. Both hoisting winches 1 and 2 have two kinds of hoisting speed, which can improve the working efficiency dramatically.

Winch	Rope diameter	Rope length	Single rope force	Rope speed on the outmost rope layer
Hoisting winch 1	28mm	1100m	16t	130m/min
Hoisting winch 2	28mm	1100m	16t	130m/min
Aux Hoisting winch	28mm	320m	16t	130m/min

Boom derrick winches

The Boom derrick winches are composed of imported axial piston constant motor, balance valve, reducer and normally closed brake as well as wire rope. Normally closed brake is adopted to make boom winch work independently. The boom winches have self-lock function. When control lever is returned to neutral position, the winding drum of boom winch will be locked by the brake automatically. There are two kinds of working radius for suspended ballast. When the crane is working with a light load, the suspended ballast can be lifted off the ground via a special adjusting device, thus allowing the crane to slew and move freely. The derrick rope is a kind of rotation resistant wire rope imported from Germany.

Winch	Rope diameter	Rope length	Single rope force	Rope speed on the outmost rope layer
Main boom derrick winch	28mm	680m	16t	2X56 m/min
Superlift derrick winch	28mm	1480m	16t	130m/min

1.3 TECHNICAL DESCRIPTION

Swing

The slewing mechanism of closed oil circuit, driven by two slewing gears, is composed of built-in axial piston constant motor, gear reducer, brake and pinion gear as well as slewing ring. The slewing mechanism has controllable free swing function, which can reduce the impacts on the crane and ensure that the slewing movements can be initiated /stopped more stably. Imported 3-row roller type, external-gear slewing ring and slewing reducer are of strong load-carrying capacity and high precision, which can ensure stable and accurate slewing movements. A mechanical locking device will be triggered to lock slewing mechanism during assembly, dismantling, and transportation of the crane. Infinitely variable Slewing speed -----0 - 0.7r/min.

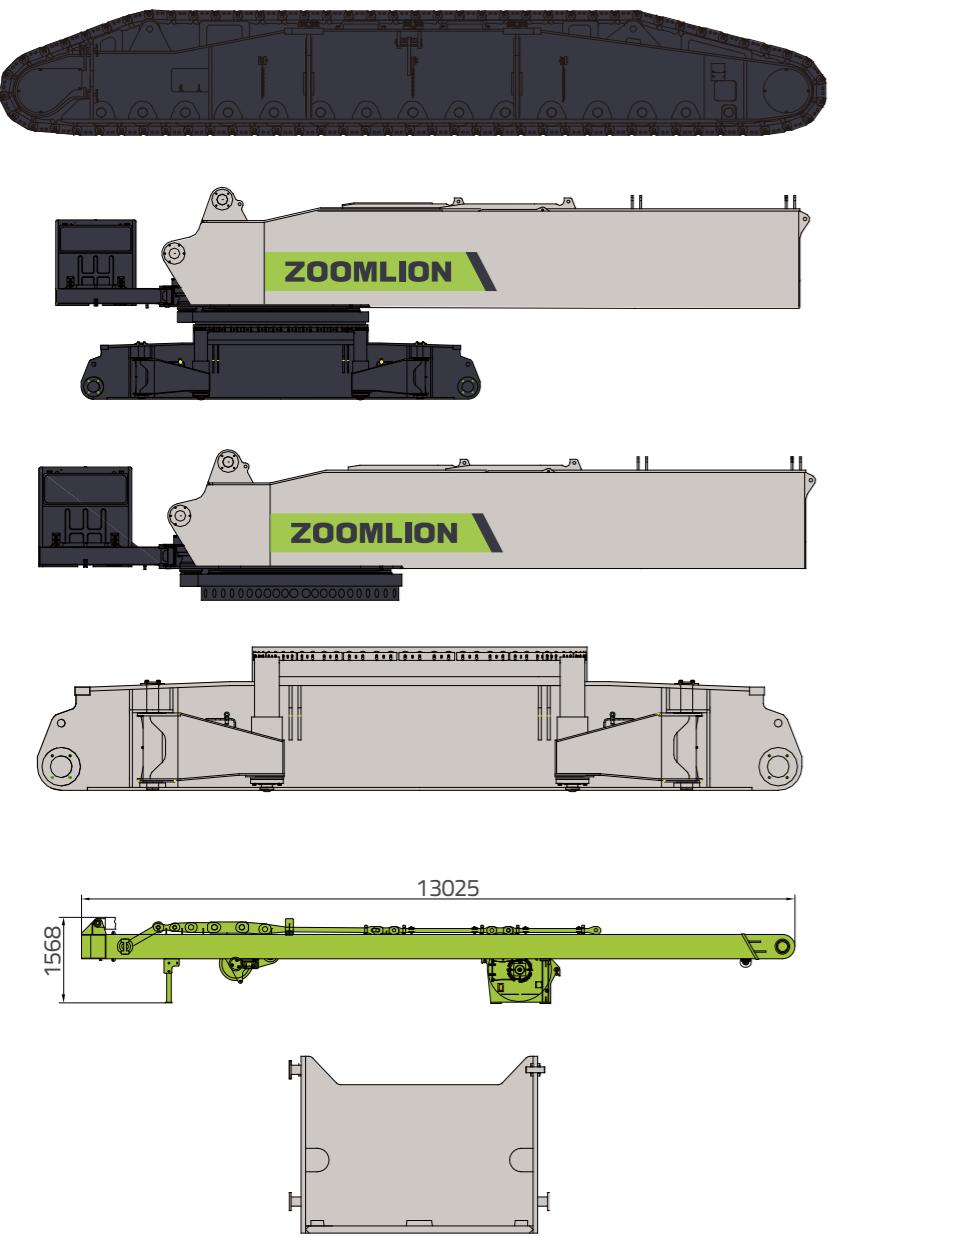

Crawler

There are two hydraulic motors and two traveling reducers fitted in each traveling mechanism. The hydraulic motors, traveling reducers and balance valves are all imported from Germany. Using control levers, the traveling movements can be controlled, such as traveling straight ahead/backwards, turning with a crawler, differential steering, turning on spot, and traveling with a load. When the crane has traveled for 20m, its deviation is less than and equal to 25cm. Additionally, the crane has high maneuverability. There are three kinds of traveling speed for the crane: high speed, low speed and inching speed. Each speed can be infinitely adjusted to ensure stable traveling movements. The track pads and track rollers are made of alloy steel, which meets the requirements in JB5318 standard. Traveling speed -----0.6/1.0 km/h. Gradeability -----30%

Rotatable load hook with safety catches:
800T load hook: 26 pulleys, used for crane operation with main boom
650T load hook: 24 pulleys, used for crane operation with main boom
400T load hook: 15 pulleys, used for crane operation with main boom
300T load hook: 12 pulleys, used for crane operation with Luffing jib
250T load hook: 10 pulleys, used for crane operation with Luffing jib
100T load hook: 4 pulleys, used for crane operation with fixed jib
50T load hook: 2 pulleys, used for crane operation with fixed jib
16T load hook: cylindrical load hook

2.1 TRANSPORT DIMENSIONS AND WEIGHT

Crawler

Remark:

- This chart doesn't highlight main boom foot(G11-9m), power boom booster(54m),main boom top section (G12-4.8m), luffing jib tapered section(G29-6m), luffing jib head (G22-4.2m).

Superlift power boom booster + wind power lifting combination SLHSDB-2 (147m-171m+7m)

3.7 LIFTING PERFORMANCE

Superlift Power Boom Booster + Wind Power Jib Lifting Performance
(Working Mode: SLHSDB-2)

4.1 MAIN CONFIGURATIONS AND SUPPLIERS

Item	Mechanisms and components		Qty	Supplier/Country
1	Main/Aux hoisting mechanism	Winch reducer	2	Rexroth/Germany
		Hydraulic motor	1	
		Balance valve	2	Bucher/Germany
2	Main derricking mechanism	Winch reducer	1	Rexroth/Germany
		Hydraulic motor	1	
		Balance valve	1	Bucher/Germany
3	Superlift derricking mechanism	Winch reducer	1	Rexroth/Germany
		Hydraulic motor	1	
		Balance valve	1	Bucher/Germany
4	Luffing derricking mechanism	Winch reducer	1	Rexroth/Germany
		Hydraulic motor	1	
		Balance valve	1	Bucher/Germany
5	Slewing mechanism	Slewing reducer	2	Rexroth/Germany
		Hydraulic motor	1	
		Slewing bearing	1	LYC/China
6	Travel mechanism	Travel reducer+motor	4	O&K or Rexroth/Germany
7	Hydraulic pump	Main pump	1	
			1	
			1	Rexroth/Germany
		Slewing pump	1	
8	Main valve	Aux pump	1	
		Main valve 1	1	
		Main valve 2	1	Rexroth/Germany
9	Engine	Main valve 3	1	
		/	1	Benz/Germany Cummins/Britain

Item	Mechanisms and components		Qty	Supplier/Country
11	Wire rope	Main/Aux wire rope	2	Pfeifer or Diepa/Germany
		Main derricking wire rope	2	
		Luffing derricking wire rope	1	
		Superlift derricking wire rope	1	
12	Electrical system	LMI system	1	Hirschmann/Germany
		Controller /Modul	3	IFM/Germany

Note: The above configuration is only for reference and it's subjected to change according to the design and customer requirements, please consult our sales representatives for configurations.
